Quality, Service, Value

Pumpcart

- Air or Electric driven 10,000 psi hydraulic pump.
- Hydraulic splitter manifold allows one or two Jacks to be operated simultaneously.
- Large hydraulic reservoir to power multiple jacks - up to four 175 Ton lift modules or six 100 Ton Lift modules
- Cart provides a convenient way to carry your tools while providing power to operate them
- Large built in storage racks to store jack accessories and hoses
- Available with easy rolling standard wheels or in a rough terrain version with large, low rolling resistance tires.
- A versatile and convenient way to provide hydraulic power to "other" 10,000 psi tools.
- Custom racking and cabinets are available for unique applications
